Toruń, 14.03.2024

Letter of Recommendation for Mr. Ram Pandey

for the European Summerschool in Quantum Chemistry

I am writing this letter to give my highest possible support and recommendation to Mr. Ram Pandey. I know Mr. Pandey through his work at the Institute of Physics, Nicolaus Copernicus University (NCU) in Toruń, where he has been working as a Ph.D. student under my supervision since December 2023. Mr. Pandey has research experience in organic chemistry but decided to switch to computational chemistry and method development. His Ph.D. topic focuses on quantum chemical modeling of organic electronics, where he is exploring different flavors of pCCD-based methods to model charge transfer properties. So far, he has only learned the most straightforward methods, like HF and DFT. More advanced quantum chemical techniques are of great importance for his further scientific developments.

I recommend Mr. Pandey and sincerely hope the committee judges his application favorably.

Yours sincerely,

Paweł Tecmer
